Vented gas fireplace heaters

Legal Notice for Standards

Canadian Standards Association and CSA America, Inc. (operating as “CSA Group”) develop standards through a consensus standards development process approved by the Standards Council of Canada and the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group’s and/or others’ intellectual property and may give rise to a right in CSA Group and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA Group reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Preface	14
1 Scope	17
2 Reference publications	18
3 Definitions	22
4 Construction	33
4.1 General construction and assembly	33
4.2 Accessibility	36
4.3 Thickness of materials	37
4.4 Evaluation of combustion/venting side sealing materials	40
4.5 Glass fronts	40
4.6 Combustion air and ventilation	41
4.7 Main burners	42
4.8 Primary air adjustment means	43
4.9 Orifice spuds and orifice fittings	44
4.10 Automatic gas ignition systems	45
4.11 Flame spreaders	47
4.12 Appliance main gas valves	48
4.13 Gas supply lines	49
4.14 Bleeds and vents	52
4.15 Thermostats	53
4.16 Automatic valves	53
4.17 Gas appliance pressure regulators	54
4.18 Adjustment of minimum input rating	54
4.19 Pilot gas filters	55
4.20 Fan and limit controls	55
4.21 Joints in heating surfaces	55
4.22 Appliance openings	57
4.23 Direct vent-air intake pipes	57
4.24 Venting (other than direct vent types)	59
4.25 Flue collars and flue outlets (other than direct vent types)	59
4.26 Draft hoods	60
4.27 Automatic vent damper devices	61
4.28 Manually operated vent dampers	61

5.37	Automatic vent damper devices	169
5.38	Cooling section of appliances with cooling units	169
5.39	Heating elements located downstream from refrigeration coils	169
5.40	Marking material adhesion and legibility	169
6	Production and manufacturing tests	170

7 Items unique to the United States 171

- 7.1 Electrical equipment and wiring 171
- 7.2 Electrical diagrams 181
- 7.3 Motors and blowers 182

8 Items unique to Canada 183

- Annex A (normative) — Automatic intermittent pilot ignition systems for field installation 205
- Annex B (normative) — Provisions for listed gas appliance conversion kits (optional) 209
- Annex C (normative) — Outline of lighting instructions for appliances equipped with continuous pilots 212
- Annex D (normative) — Outline of operating instructions for appliances equipped with intermittent pilot or interrupted pilot systems 215
- Annex E (normative) — Outline of operating instructions for appliances equipped with direct ignition systems 218
- Annex F (normative) — Delayed ignition test using a stoichiometric gas-air mixture for natural gas direct vent fireplaces 221
- Annex G (normative) — Sample failure modes and effects analysis for component miswiring* 224
- Annex H (normative) — Glass temperature calculation 225
- Annex I (normative) — Recommended wire color usage 229
- Annex J (informative) — Pertinent references to ANSI Y14.15 230
- Annex K (informative) — Wire color designations 231
- Annex L (informative) — Preferred graphic symbols of commonly used items, extracted from the Standard ANSI/IEEE 315, *Graphic Symbols for Electrical and Electronics Diagrams*, and abbreviations for these items 232
- Annex M (informative) — Table of conversion factors 234

Preface

This is the sixth edition of ANSI Z21.88 • CSA 2.33, *Vented gas fireplace heaters*. It supersedes the previous editions published in 2009, 2005, 2002, 2000, and 1998.

This Standard was prepared by the Z21/CSA Joint Technical Subcommittee on Standards for Vented Gas-Fired Warm Air Heaters, under the jurisdiction of the Z21/83 Technical Committee on Performance and Installation of Gas Burning Appliances and Related Accessories, the Canadian Technical Committee on Gas Appliances and Related Accessories, and the Strategic Steering Committee on Standards for Fuel Burning Equipment, and had been formally approved by the Technical Committees, American National Standards Institute, and the Interprovincial Gas Advisory Council.

Interpretations: The Strategic Steering Committee on Standards for Fuel Burning Equipment has provided the following direction for the interpretation of standards under its jurisdiction: “The literal text shall be used in judging compliance of products with the safety requirements of this Standard. When the literal text cannot be applied to the product, such as for new materials or construction, and when a relevant committee interpretation has not already been published, CSA Group’s procedures for interpretation shall be followed to determine the intended safety principle.”

Notes:

- 1) *Use of the singular does not exclude the plural (and vice versa) when the sense allows.*
- 2) *This Standard contains SI (Metric) units corresponding to the yard/pound quantities, the purpose being to allow the standard to be used in SI (Metric) units. (IEEE/ASTM SI 10, American National Standard for Metric Practice, or ISO 80000-1:2009, Quantities and units – Part 1: General, is used as a guide in making metric conversion from yard/pound quantities.) If a value for a measurement and a corresponding value in other units are stated, the first stated value is to be regarded as the requirement. The given corresponding value may be approximate. If a value for a measurement and a corresponding value in other units are both specified as a quoted marking requirement, the first stated unit, or both, are to be provided.*
- 3) *Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users of the Standard to judge its suitability for their particular purpose.*
- 4) *This publication was developed by consensus, which is defined by CSA Policy governing standardization – Code of good practice for standardization as “substantial agreement. Consensus implies much more than a simple majority, but not necessarily unanimity.” It is consistent with this definition that a member may be included in the Technical Committee list and yet not be in full agreement with all clauses of this publication.*
- 5) *This Standard is subject to review five years from the date of publication, and suggestions for its improvement will be referred to the appropriate committee. To submit a proposal for change, please send the following information to inquiries@csagroup.org and include “Proposal for change” in the subject line:*
 - a) *Standard designation (number);*
 - b) *relevant clause, table, and/or figure number;*
 - c) *wording of the proposed change; and*
 - d) *rationale for the change.*
- 6) *To submit a request for interpretation of this Standard, please send the following information to inquiries@csagroup.org and include “Request for interpretation” in the subject line:*
 - a) *define the problem, making reference to the specific clause, and, where appropriate, include an illustrative sketch;*
 - b) *provide an explanation of circumstances surrounding the actual field condition; and*
 - c) *where possible, phrase the request in such a way that a specific “yes” or “no” answer will address the issue.*
- 7) *Committee interpretations are processed in accordance with the CSA Directives and guidelines governing standardization and are available on the Current Standards Activities page at standardsactivities.csa.ca.*

History of the development of the Standard for Vented gas fireplace heaters

Note: *This history is informative and is not part of the standard.*

With the onset of the Free Trade Agreement between the United States and Canada on January 2, 1988, significant attention was given to the harmonization of the United States and Canadian safety standards addressing gas-fired equipment for residential, commercial and industrial applications. It was believed that the elimination of the differences between the standards would remove potential trade barriers and provide an atmosphere in which North American manufacturers could market more freely in the United States and Canada. The harmonization of these standards was also seen as a step toward harmonization with international standards. Joint subcommittees were established to facilitate the standards harmonization process between the United States and Canada.

At its October 19-20, 1995 meeting, the Z21/CGA Joint Subcommittee on Standards for Vented Gas-Fired Warm Air Heaters formed a working group to prepare a draft bi-national standard for Vented Gas Fireplace Heaters. During its October 22-23, 1996 meeting the joint subcommittee approval to send the draft standard for public review and comment.

The first draft harmonized standard was based on current coverage from the *American National Standard/Canadian Gas Association Standard for Vented Gas Fireplace*, ANSI Z21.50-1996 • CGA 2.22-M96, and the *American National Standard/CSA Standard for Vented Gas-Fired Space Heating Equipment*, ANSI Z21.86-1998 • CSA 2.32-M98.

Following reconsideration and modification of the proposed draft standard, in light of comments received, the joint vented heater subcommittee at its March 10-11, 1997 meeting, recommended the proposed draft standard to Accredited Standards Committee Z21/83 and the (Interim CSA) Standards Steering Committee for approval.

The proposed draft of the harmonized standard for vented gas-fireplace heaters, as modified by the joint subcommittee, was approved by the Z21/83 Committee by letter ballot dated August 19, 1997, and by the CGA Standards Steering Committee by letter ballot dated January 5, 1998.

The first edition of the *American National Standard/CSA Standard for Vented Gas Fireplace Heaters* was approved by the Canadian Interprovincial Gas Advisory Council on February 26, 1998, and by the American National Standards Institute, Inc., on March 31, 1998.

The second edition of the *American National Standard/CSA Standard for Vented Gas Fireplace Heaters* was approved by the Canadian Interprovincial Gas Advisory Council on June 1, 2000, and by the American National Standards Institute, Inc., on October 20, 1999.

The third edition of the harmonized *American National Standard/CSA Standard for Vented Gas Fireplace Heaters* was approved by the Canadian Interprovincial Gas Advisory Council on March 18, 2002 and by the American National Standards Institute, Inc., on April 11, 2002.

The fourth edition of the harmonized *American National Standard/CSA Standard for Vented Gas Fireplace Heaters* was approved by the Canadian Interprovincial Gas Advisory Council on December 2, 2005 and by the American National Standards Institute, Inc., on October 19, 2005.

Following the procedures outlined above further revisions to this standard were made in line with industry developments.

The fifth edition of the harmonized *American National Standard/CSA Standard for Vented Gas Fireplace Heaters* was approved by the Interprovincial Gas Advisory Council on December 29, 2009 and by the American National Standards Institute, Inc., on March 26, 2009.

This, the sixth edition of the *Standard for Vented gas fireplace heaters* was approved by the Z21/83 Technical Committee on Performance and Installation of Gas Burning Appliances and Related Accessories on December 20, 2013; the Canadian Technical Committee on Gas Appliances and Related Accessories on October 30, 2013; the IGAC on February 18, 2014; and ANSI on February 20, 2014.

The previous editions of the vented gas fireplace heaters standard, and addenda thereto, approved by the Interprovincial Gas Advisory Council and American National Standards Institute, Inc. are as follows:

ANSI Z21.88-1998 • CSA 2.33-M98	ANSI Z21.88a-1998 • CSA 2.33a-M98 ANSI Z21.88b-1999 • CSA 2.33b-M99
ANSI Z21.88-2000 • CSA 2.33-2000	ANSI Z21.88a-2000 • CSA 2.33a-2000 ANSI Z21.88b-2001 • CSA 2.33b-2001

The following identifies the designation and year of the fifth edition of the standard:

ANSI Z21.88-2014 • CSA 2.33-2014

Note: *This edition of ANSI Z21.88 • CSA 2.33 incorporates changes to the 2009 edition and addenda thereto. Changes, other than editorial, are denoted by a delta symbol in the margin.*

ANSI Z21.88-2014 • CSA 2.33-2014

Vented gas fireplace heaters

1 Scope

1.1

This Standard applies to newly produced vented gas fireplace heaters (see Clause 3, Definitions), hereinafter referred to as appliance(s), constructed entirely of new, unused parts and materials, and having input ratings up to and including 400,000 Btu/hr (117 228 W);

- a) for use with natural gas;
- b) for use with liquefied petroleum (propane);
- c) direct vent appliances for manufactured home (USA only) or mobile home OEM installation convertible for use with natural gas and propane when provision is made for simple conversion from one gas to the other [see Clause 4.1.4a) and (b)];
- d) direct vent appliances for manufactured home (USA only) or mobile home aftermarket installation for use with natural gas only or liquefied petroleum (propane) gases only [see Clause 4.1.4b)];
- e) direct vent appliances for recreational vehicle installation for use with liquefied petroleum (propane) gases only [see Clause 4.1.4c)];
- f) direct vent appliances for recreational vehicle installation only convertible for use with natural gas and liquefied petroleum (propane) gases when provision is made for the simple conversion from one gas to the other [see Clause 4.1.4c)]; and
- g) for direct vent appliances for manufactured home (USA only) or mobile home OEM installation for use with liquefied petroleum (propane) gases only [see Clause 4.1.4a)].

The construction of vented gas fireplace heaters and vented gas fireplace heaters with cooling units for use with the above-mentioned gases is covered under Clause 4, Construction.

The performance of vented gas fireplace heaters and vented gas fireplace heaters with cooling units for use with the above-mentioned gases is covered under Clause 5, Performance.

1.2

Annex A, Automatic intermittent pilot ignition systems for field installation, includes provisions for newly produced (optional) automatic intermittent pilot ignition systems (see Clause 3, Definitions), constructed entirely of new, unused parts and materials, to be adapted in the field to an appliance equipped with an existing continuous pilot burner and which has been examined and tested for compliance with this Standard when installed on the appliance.

1.3

If a value for measurement given in this standard is followed by an equivalent value in other units, the first stated value is to be regarded as the specification.

1.4

All references to “psi” throughout this Standard are to be considered gauge pressures, unless otherwise specified.
