Industrial Security for  
Nuclear Power Plants**

**Secretariat  
American Nuclear Society**

**Approved July 18, 1973  
American National Standards Institute, Inc.**

## **American National Standard**

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

**CAUTION NOTICE:** This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

# Foreword

(This Foreword is not a part of American National Standard for Industrial Security for Nuclear Power Plants, N18.17-1973.)

Security of industrial installations has traditionally been oriented toward protection of a given facility against theft and acts of malicious mischief or vandalism, except where the nature of the work at a given facility required added protective measures against compromise of proprietary information or materials, or safeguarding of information or materials associated with sensitive national defense and security matters. In addition, some industrial activities are of potential hazard to casual intruders and security measures are necessary to protect the owner against liability claims.

The safety measures employed to avoid the creation of hazards to off-site members of the public in certain potentially hazardous industries, such as certain chemical manufacturing operations, and in the nuclear power industry, have not normally been considered to be directly associated with industrial security programs. However, recent trends of violence and coercion by certain subcultures of modern society have served to emphasize the close relationship between the health and safety considerations for the off-site public and the need for augmented industrial security measures.

This standard is intended to provide criteria for the planning of comprehensive industrial security programs for nuclear power plants. In the preparation of the standard, the writers became aware of the paucity of guidance available on the subject, and concluded that it was appropriate to provide background material in somewhat greater detail than is the normal practice in standards preparation. For that reason, the reader will note that the Scope of the standard is relatively long.

The American National Standards Committee N18, Nuclear Design Criteria, which reviewed and approved this standard in 1973, had the following membership:

L. J. Koch, Chairman  
A. H. Redding, Vice Chairman  
N. E. Wandke, Secretary

<i>Organization Represented</i>	<i>Name of Representative</i>
American Chemical Society .....	J. W. Morris C. E. Stevenson (Alt)
American Concrete Institute .....	Paul E. Mast
American Nuclear Society .....	L. J. Koch N. E. Wandke
American Public Health Association .....	J. R. Coleman
American Society of Civil Engineers .....	M. I. Goldman C. Gogolick (Alt)
American Society of Mechanical Engineers .....	J. S. Bitel R. H. Holyoak (Alt)
American Welding Society .....	J. R. McGuffey
Atomic Industrial Forum .....	J. A. Hinds
Electric Light and Power Group .....	J. E. Howard G. A. Olson (Alt)
Federal Power Commission .....	R. R. Boyd B. B. Chew (Alt)
Health Physics Society .....	J. M. Smith R. L. Clark (Alt)
Institute of Electrical and Electronics Engineers .....	J. T. Boettger
Institute of Nuclear Materials Management .....	J. Arendt L. A. Strom (Alt)
Nuclear Energy Liability Insurance Association .....	F. Catudal F. Chin (Alt)
U.S. Atomic Energy Commission .....	R. B. Minogue A. J. Pressesky
U.S. Environmental Protection Agency .....	D. S. Smith G. Burley (Alt)
Individual Members .....	E. N. Cramer R. J. Creagan J. F. Gibbons T. D. Jones J. S. Moore D. Patterson A. H. Redding G. C. Robinson G. L. Wessman J. F. West C. B. Zitek

This standard was prepared by Subcommittee ANS-3, Reactor Operations, of the American Nuclear Society Standards Committee. At the time of approval, the membership of the Subcommittee was:

J.A.Prestele, *Chairman,*  
*Consolidated Edison Company of N.Y.*  
H.T.Babb, *South Carolina Electric*  
*and Gas Company*  
S.E.Bryan, *Secretary,*  
*U.S. Atomic Energy Commission*  
J.C.Carroll, *Pacific Gas and*  
*Electric Company*

M.J.Cooney, *Philadelphia Electric Company*  
R.L.Haueter, *Consumers Power Company*  
R.F.Jones, *Alternate Chairman,*  
*Metropolitan Edison Company*  
J.A.List, *E. I. duPont de Nemours and Company*  
F.A.Palmer, *Commonwealth Edison Company*  
D.Thompson, *U.S. Atomic Energy Commission*  
G.K.Whitham, *Argonne National Laboratory*

The Subcommittee was assisted substantially by security specialists appointed to the ad hoc working group formed for the development of this standard. Their contributions are gratefully acknowledged. Included in this group are:

C.E.Collins, *Tennessee Valley Authority*  
H.E.Collins, *U.S. Atomic Energy Commission*  
R.D.Ramsay, *Pacific Gas and Electric Company*

C.B.Sauer, *Tennessee Valley Authority*  
C.B.Sawyer, *U.S. Atomic Energy Commission*

# Contents

	Section	Page
1.	Scope.....	1
2.	Definitions.....	2
	2.1 Limitations.....	2
	2.2 Glossary of Terms.....	2
