**American  
National  
Standard**

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

**CAUTION NOTICE:** This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of this standard may receive current information, including interpretations, on all standards published by the American Nuclear Society by calling or writing to the Society.

**Foreword** (This Foreword is not a part of American National Standard Medical Certification and Monitoring of Personnel Requiring Operator Licenses for Nuclear Power Plants, ANSI/ANS-3.4-1983.)

The organization which operates a nuclear power plant has the responsibility for safe and efficient operation of the plant. Inherent in this overall responsibility is the responsibility to select and retain operators and senior operators that are physically capable of such operations. The selection of operators and senior operators is of great importance since they perform and direct the manipulations of mechanisms and controls that affect the safe operation of the reactor. This standard provides the minimum requirements necessary for an examining physician to determine that the physical condition and general health of the operators are not such as might cause operational errors.

This standard was developed by Working Group ANS-3.4 of the American Nuclear Society Standards Committee which had the participation of the following members during the period it prepared and approved the standard:

R. L. Craig, M.D., Chairman Tennessee Valley Authority	J. L. Craig, M.D. General Mills, Inc.
W. R. Albers, M.D. U.S. Department of Energy	T. J. Doyle, M.D. Consolidated Edison Company
P. F. Collins U.S. Nuclear Regulatory Commission	G. A. Poda, M.D. E. I. duPont deNemours and Company
M. J. Cooney Philadelphia Electric Company	

The membership of Subcommittee ANS-3, Reactor Operations, at the time of its approval of this standard was:

J. E. Smith, Chairman Duke Power Company	R. J. Rodriguez Sacramento Municipal Utility District
S. E. Bryan U.S. Nuclear Regulatory Commission	J. D. Shiffer Pacific Gas and Electric
F. A. Dougherty Tera Corporation	D. J. Skovholt U.S. Nuclear Regulatory Commission
N. S. Elliott Babcock & Wilcox Company	E. L. Thomas Institute of Nuclear Power Operations
T. W. Fitzgerald American Nuclear Insurers	W. T. Ullrich Peach Bottom Atomic Power Station
H. J. Green Tennessee Valley Authority	P. F. Walzer Washington Public Power Supply System
F. L. Kelly PQA Corporation	G. K. Whitham Argonne National Laboratory
R. L. Ottoson Southern California Edison	
F. A. Palmer Commonwealth Edison Company	

The American Nuclear Society's Nuclear Power Plant Standards Committee (NUPPSCO) had the following membership at the time of its approval of this standard.

L. J. Cooper, Chairman  
M. D. Weber, Secretary
