Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: "*Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards*", which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<https://ipr.etsi.org>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Technical Specification (TS) has been produced by ETSI 3rd Generation Partnership Project (3GPP).

The present document may refer to technical specifications or reports using their 3GPP identities, UMTS identities or GSM identities. These should be interpreted as being references to the corresponding ETSI deliverables.

The cross reference between GSM, UMTS, 3GPP and ETSI identities can be found under <http://webapp.etsi.org/key/queryform.asp>.

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Annex B (normative):	Propagation Conditions.....	2934
B.0	No interference	2934
B.1	Static propagation condition.....	2934
B.1.1	Definition of Additive White Gaussian Noise (AWGN) Interferer.....	2934
B.2	Multi-path fading Propagation Conditions.....	2934
B.2.1	Delay profiles	2935

B.2.2	Combinations of channel model parameters	2936
B.2.3	MIMO Channel Correlation Matrices	2936
B.2.3.1	Definition of MIMO Correlation Matrices	2936
B.2.3.2	MIMO Correlation Matrices at High, Medium and Low Level.....	2937
B.2.3A	MIMO Channel Correlation Matrices using cross polarized antennas	2939
B.2.3A.1	Definition of MIMO Correlation Matrices using cross polarized antennas	2940
B.2.3A.2	Spatial Correlation Matrices using cross polarized antennas at eNB and UE sides	2940
B.2.3A.2.1	Spatial Correlation Matrices at eNB side	2940
B.2.3A.2.2	Spatial Correlation Matrices at UE side	2940
B.2.3A.3	MIMO Correlation Matrices using cross polarized antennas	2941
B.2.3A.4	Beam steering approach	2942
B.2.4	Propagation conditions for CQI tests.....	2942
B.2.5	FFS	2942
B.2.6	MBSFN Propagation Channel Profile	2942
B.3	High speed train scenario	2943
B.4	Beamforming Model	2945
B.4.1	Single-layer random beamforming (Antenna port 5, 7 or 8)	2945
B.4.2	Dual-layer random beamforming (antenna ports 7 and 8).....	2945
B.4.3	Generic beamforming model (antenna ports 7-14).....	2946
B.4.4	Random beamforming for EPDCCH distributed transmission (Antenna port 107 and 109).....	2946
B.4.5	Random beamforming for EPDCCH localized transmission (Antenna port 107, 108, 109 or 110).....	2947
B.5	Interference models for enhanced performance requirements Type-A	2947
B.5.1	Dominant interferer proportion	2947
B.5.2	Transmission mode 3 interference model.....	2947
B.5.3	Transmission mode 4 interference model.....	2948
B.5.4	Transmission mode 9 interference model.....	2948
B.6	Interference models for enhanced performance requirements Type-B	2948
B.6.1	Transmission mode 2 interference model.....	2949
B.6.2	Transmission mode 3 interference model.....	2949
B.6.3	Transmission mode 4 interference model.....	2949
B.6.4	Transmission mode 9 interference model.....	2950
B.6.5	CRS interference model	2950
B.6.6	Random interference model	2950
Annex C (normative): Downlink Physical Channels.....		2952
C.0	Downlink signal levels	2952
C.1	General	2952
C.2	Set-up	2955
C.3	Connection	2956
C.3.0	Measurement of Transmitter Characteristics.....	2956

Foreword

This Technical Specification has been produced by the 3rd Generation Partnership Project (3GPP).

The contents of the present document are subject to continuing work within the TSG and may change following formal TSG approval. Should the TSG modify the contents of the present document, it will be re-released by the TSG with an identifying change of release date and an increase in version number as follows:

Version x.y.z

where:

- x the first digit:
 - 1 presented to TSG for information;
 - 2 presented to TSG for approval;
 - 3 or greater indicates TSG approved document under change control.
- y the second digit is incremented for all changes of substance, i.e. technical enhancements, corrections, updates, etc.
- z the third digit is incremented when editorial only changes have been incorporated in the document.

Introduction

The present document is part 1 of a multi-parts TS:

3GPP TS 36.521-1: Evolved Universal Terrestrial Radio Access (E-UTRA); User Equipment (UE) conformance specification Radio transmission and reception; Part 1: Conformance Testing.

3GPP TS 36.521-2 [11]: Evolved Universal Terrestrial Radio Access (E-UTRA); User Equipment (UE) conformance specification Radio transmission and reception; Part 2: Implementation Conformance Statement (ICS).

3GPP TS 36.521-3 [12]: Evolved Universal Terrestrial Radio Access (E-UTRA); User Equipment (UE) conformance specification Radio transmission and reception; Part 3: Radio Resource Management (RRM) conformance testing.

1 Scope

The present document specifies the measurement procedures for the conformance test of the user equipment (UE) that contain transmitting characteristics, receiving characteristics and performance requirements as part of the 3G Long Term Evolution (3G LTE). Conformance test for the support of RRM (Radio Resource Management) are specified in TS 36.521-3 [12].

The requirements are listed in different clauses only if the corresponding parameters deviate. More generally, tests are only applicable to those mobiles that are intended to support the appropriate functionality. To indicate the circumstances in which tests apply, this is noted in the "*definition and applicability*" part of the test.

For example only Release 8 and later UE declared to support LTE shall be tested for this functionality. In the event that for some tests different conditions apply for different releases, this is indicated within the text of the test itself.
