5.2.1.24 INTERROGATE STATUS ACK PDU 45
5.2.2 TETRA PDU information element coding 45
5.2.2.1 Accept/reject 45
5.2.2.1a Activated forwarding types and basic services 46
5.2.2.2 Activating/activation changing/deleting/parameterising user type 46
5.2.2.2a Activation/deactivation 46
5.2.2.3 Activation by served user 46
5.2.2.4 Addressing information elements 46
5.2.2.4.1 General on addresses 46
5.2.2.4.2 Address type of the authorized user 47
5.2.2.4.3 Address type of the forwarded-to user 47
5.2.2.4.4 Address type of the last forwarding user 47
5.2.2.4.5 Address type of the originally called user 47
5.2.2.4.6 Address type of the served user 47
5.2.2.5 Basic service information 48
5.2.2.6 CF-PDU type 49
5.2.2.7 Enabled authorized user definition 50
5.2.2.8 External subscriber number 50
5.2.2.9 External subscriber number digit 50
5.2.2.10 Forwarded-to definition 50
5.2.2.10a Forwarded-to user address 51
5.2.2.10b Forwarding types and basic services 52
5.2.2.10c Forwarding types and basic services present 52
5.2.2.11 Forwarding types 52
5.2.2.11a Interrogating user type 53
5.2.2.12 Invoked call forwarding type 53
5.2.2.13 Last forwarding type 53
5.2.2.14 Number of external subscriber number digits 53
5.2.2.15 Original forwarding type 53
5.2.2.15a Parameters addition/removal 53
5.2.2.16 Reject cause 54
5.2.2.17 Served user definition 54
5.2.2.18 SS-CF invocation counter 55
5.2.2.19 SS type 55
5.2.3 Additional coding requirements over the ISI 55
5.3 SS-CF State Definitions 57
5.3.1 General on state definitions 57
5.3.2 States at the calling user MS 57
5.3.3 States at the originating SwMI 57
5.3.4 States at the Served User MS 57
5.3.5 States at the served user SwMI 57
5.3.6 States at the forwarded-to user MS 57

5.3.7 States at the forwarded-to SwMI 57
5.3.8 States at the re-routeing SwMI 58
5.3.9 States at the authorized user MS 58
5.3.10 States at the Activating SwMI 58
5.3.11 States at the deactivating user MS 58
5.3.12 States at the deactivating SwMI 58
5.3.13 States at the interrogating user MS 58
5.3.14 States at the interrogating SwMI 58
5.4 SS-CF signalling procedures 58
5.4.1 Actions at MSs 58
5.4.1.1 Activation requesting user MS 58
5.4.1.1.1 Normal operation 58
5.4.1.1.2 Exceptional procedures 59
5.4.1.2 Deletion requesting user MS 59
5.4.1.2.1 Normal operation for served or authorized user MS 59
5.4.1.2.2 Exceptional procedures for served or authorized user MS 59
5.4.1.2.3 Normal operation for forwarded-to user MS 59
5.4.1.2.4 Exceptional procedures for forwarded-to user MS 59
5.4.1.3 Interrogation requesting user MS 60
5.4.1.3.1 Normal operation of interrogation 60
5.4.1.3.2 Exceptional procedures for interrogation services 60
5.4.1.4 Interrogation requesting forwarded-to user MS 60
5.4.1.4.1 Normal operation of interrogation 60
5.4.1.4.2 Exceptional procedures for interrogation 60
5.4.1.5 Unsolicited indication to the served user 60
5.4.1.6 Invocation and operation at MS 60
5.4.1.6.1 General on SS-CF invocation indications 60
5.4.1.6.2 Notification to the calling user 61
5.4.1.6.3 Additional indication to the calling user 61
5.4.1.6.4 Notification to the forwarded-to user 61
5.4.1.6.5 Additional indication to the forwarded-to user 61
5.4.1.6.6 Identification of the forwarded-to user to the calling user 61
5.4.1.7 Reminder notification to the served user 61
5.4.1.7.1 Normal operation 61
5.4.1.7.2 Exceptional procedures 61
5.4.1.8 Parameterise requesting user MS 61
5.4.1.8.1 Normal operation 61
5.4.1.8.2 Exceptional procedures 62
5.4.1.9 Change activation requesting user MS 62
5.4.1.9.1 Normal operation 62
5.4.1.9.2 Exceptional procedures 63
5.4.1.10 Disable requesting user MS 63
5.4.1.10.1 Normal operation 63
5.4.1.10.2 Exceptional procedures 63
5.4.1.11 Enable requesting user MS 63
5.4.1.11.1 Normal operation 63
5.4.1.11.2 Exceptional procedures 63
5.4.2 Actions at the originating SwMI 64
5.4.2.1 General requirements 64
5.4.2.2 Normal Procedure 64
5.4.2.3 Exceptional Procedures 64
5.4.3 Actions at the served user home SwMI 64
5.4.3.1 Normal Procedure 64
5.4.3.1.1 Activation 64
5.4.3.1.2 Deletion 65
5.4.3.1.3 Interrogation 65
5.4.3.1.4 Invocation and operation 65
5.4.3.1.5 Reminder notification to the served user 67
5.4.3.1.6 Parameterise 67
5.4.3.1.7 Change activation 67
5.4.3.1.8 Disabling 67
5.4.3.1.9 Enabling 68

5.4.3.2 Exceptional Procedures 68
5.4.3.2.1 Activation 68
5.4.3.2.2 Deletion 68
5.4.3.2.3 Interrogation 68
5.4.3.2.4 Invocation 68
5.4.3.2.5 Parameterise 68
5.4.3.2.6 Change activation 69
5.4.3.2.7 Disabling 69
5.4.3.2.8 Enabling 69
5.4.4 Actions at the Forwarding SwMI 69
5.4.4.1 Functionalities in the case of call forwarding by re-routeing 69
5.4.4.2 Functionalities in the case of call forwarding by forward switching 69
5.4.4.3 Normal procedure 69
5.4.4.4 Exceptional procedures 69
5.4.5 Procedures at the forwarded-to SwMI 69
5.4.5.1 Normal procedure on invocation 69
5.4.5.2 Exceptional Procedures 70
5.4.6 Procedures at the served or authorized user visited SwMI 70
5.4.6.1 Normal Procedure 70
5.4.6.2 Exceptional Procedures 70
5.4.7 Protocol for SS-CF invocation counter 70
5.5 Interworking 70
5.6 Protocol Interactions between SS-CF and other SSs and ANFs 70
5.6.1 Interactions with Ambience Listening (SS-AL) 70
5.6.2 Interactions with Call Authorized by Dispatcher (SS-CAD) 71
5.6.3 Other protocol interactions of SS-CFU 71
5.6.3.1 Interaction with Completion of Call to Busy Subscriber (SS-CCBS) 71
5.6.3.1.0 General 71
5.6.3.1.1 Originating SwMI procedures for invoking CCBS at a CFU forwarded-to user 71
5.6.3.1.2 Originating SwMI procedures if CFU is activated by SS-CCBS user A 71
5.6.3.1.3 Terminating SwMI procedures if CFU is activated by user B after CCBS has been invoked 71
5.6.3.2 Interaction with Completion of Calls on No Reply (SS-CCNR) 72
5.6.3.2.0 General 72
5.6.3.2.1 Originating SwMI procedures for invoking CCNR at a CFU diverted-to user 72
5.6.3.2.2 Originating SwMI procedures if CFU is activated by SS-CCNR user A 72
5.6.3.2.3 Terminating PINX procedures if CFU is activated by user B after CCNR has been invoked 72
5.6.3.3 Interaction with Call Forwarding Busy (SS-CFB) 72
5.6.3.4 Interaction with Call Forwarding No Reply (SS-CFNR) 72
5.6.4 Protocol interactions of SS-CFB 72
5.6.4.1 Interaction with Completion of Calls to Busy Subscriber (SS-CCBS) 72
5.6.4.1.0 General 72
5.6.4.1.1 Originating SwMI procedures for invoking CCBS at a CFB diverted-to user 73
5.6.4.1.2 Originating SwMI procedures if CFB is activated by SS-CCBS user A 73
5.6.4.1.3 Terminating SwMI procedures if CFB is activated by user B after CCBS has been invoked 73
5.6.4.2 Interaction with Completion of Calls on No Reply (SS-CCNR) 73
5.6.4.2.0 General 73
5.6.4.2.1 Originating SwMI procedures for invoking CCNR at a CFB diverted-to user 73
5.6.4.2.2 Originating SwMI procedures if CFB is activated by SS-CCNR user A 73
5.6.4.2.3 Terminating SwMI procedures if CFB is activated by user B after CCNR has been invoked 73
5.6.4.3 Interaction with Call Forwarding Unconditional (SS-CFU) 73
5.6.4.4 Interaction with Call Forwarding No Reply (SS-CFNRy) 73
5.6.4.5 Interaction with Call Waiting (SS-CW) 73
5.6.5 Protocol interactions of SS-CFNRy 73
5.6.5.1 Interaction with Completion of Calls to Busy Subscriber (SS-CCBS) 73
5.6.5.2 Interaction with Completion of Calls on No Reply (SS-CCNR) 74
5.6.5.2.0 General 74
5.6.5.2.1 Originating SwMI procedures for invoking CCNR at a CFNR diverted-to user 74
5.6.5.2.2 Originating SwMI procedures if CFNR is activated by SS-CCNR user A 74
5.6.5.2.3 Terminating SwMI procedures if CFNR is activated by user B after CCNR has been invoked 74
5.6.5.3 Interaction with Call Forwarding Unconditional (SS-CFU) 74
5.6.5.4 Interaction with Call Forwarding Busy (SS-CFB) 74
5.6.6 Other protocol interactions of SS-CFNRc 74

5.6.6.0 General 74
5.6.6.1 Protocol interactions of SS-CFNRc in the case of early CFNRc 74
5.6.6.2 Protocol interactions of SS-CFNRc in the case of late CFNRc 74
5.6.7 Protocol interactions of SS-CF with ANF-Inter-System-Interface Individual Call (ANF-ISIIC) 75
5.6.7.1 General on interactions 75
5.6.7.2 Interactions of SS-CFU with ANF-ISIIC 75
5.6.7.3 Interactions of SS-CFNRc with ANF-ISIIC 75
5.6.7.4 Interactions of SS-CFB and SS-CFNRy with ANF-ISIIC 75
5.6.8 Protocol Interactions of SS-CF with ANF Group Call 75
5.6.8.0 General 75
5.6.8.1 Protocol interactions of SS-CFU with ANF-ISIGC 75
5.6.8.2 Protocol interactions of SS-CFB with ANF-ISIGC 76
5.6.9 Protocol Interactions of SS-CF with ANF-SDS 76
5.6.10 Protocol interactions of SS-CF with ANF Mobility Management 77
5.6.10.0 General 77
5.6.10.1 Protocol interactions of SS-CFU, early SS-CFB and early SS-CFNRc with ANF-MM 79
5.6.10.2 Protocol interactions of late SS-CFB, SS-CFNRy and SS-CFNRc with ANF-MM 79
5.6.10.2.1 Protocol interactions affecting the calling user 79
5.6.10.2.2 Protocol interactions affecting the called/served user 79
5.6.10.2.3 Protocol interactions affecting the forwarded-to user 80
5.6.10.3 Interaction with SS-CF at call restoration 80
5.7 SS-CF parameter values (timers) 81
5.8 Support of SDS and STATUS 81

Annex A (informative): Interactions of SS-CFB and SS-CFNRy with ANF-ISIIC 82

A.1 Interactions of SS-CFB and SS-CFNRy with ANF-ISIIC 82

A.2 Interactions 82
A.2.1 Interactions of late SS-CFB and SS-CFNRy with ANF-ISIIC 82
A.2.2 Protocol interactions in cases 1, 10 and 11 85
A.2.2.1 General on cases 1, 10 and 11 85
A.2.2.2 Case 1 85
A.2.2.3 Case 10 86
A.2.2.4 Case 11 87
A.2.3 Protocol interactions affecting the called/served user 89
A.2.3.1 General 89
A.2.3.2 Case 2 89
A.2.3.3 Case 4 91
A.2.3.4 Case 5 92
A.2.3.5 Case 7 94
A.2.4 Protocol interactions affecting the forwarded-to user 95
A.2.4.1 General 95
A.2.4.2 Case 3 96
A.2.4.3 Case 6 96
A.2.4.4 Case 8 98
A.2.4.5 Case 9 100
A.2.4.6 Case 12 102

Annex B (normative): Interworking with other networks 103

B.1 Procedures for interworking with public ISDNs 103
B.1.1 Actions at an incoming gateway SwMI 103
B.1.2 Actions at an outgoing gateway SwMI 103
B.1.3 Procedures where a call from the public ISDN is forwarded within or beyond TETRA 103
B.1.3.1 Normal operation 103
B.1.3.2 Exceptional procedures 104
B.1.3.3 Presentation of a forwarded call from a public ISDN to the TETRA network 104
B.1.3.3.1 Normal operation 104
B.1.3.3.2 Exceptional procedures 104
B.1.4 Procedures where a call from the TETRA network is forwarded within or beyond the public ISDN 105
B.1.5 Presentation of a forwarded call from a TETRA network to the public ISDN 105
B.1.5.1 Normal operation 105

B.1.5.2 Exceptional procedures 105
B.1.6 Procedures where a call from the public ISDN is forwarded within or beyond the TETRA network and partial re-routeing takes place in the public ISDN 106
B.1.6.1 Normal operation 106
B.1.6.2 Exceptional procedures 108
B.1.7 Procedures where a call from the public ISDN to the TETRA network is forwarded by the public ISDN 108

B.2 SS-CF Impact of interworking with non-ISDNs 109
B.2.1 Impact of interworking on incoming calls 109
B.2.2 Impact of interworking on outgoing calls 109

Annex C (normative): SS-CF profile for mobility management 110

C.1 Profile exchange 110

C.2 Profile definitions 110
C.2.1 General on SS-CF profiles 110
C.2.2 PDU definitions 110
C.2.2.1 SS-PROFILE REJECT PDU 110
C.2.2.2 SS-PROFILE UPDATE PDU 110
C.2.2.3 SS-PROFILE UPDATE RESPONSE PDU 111
C.2.3 Information element definitions 111
C.2.3.1 Basic migration profile info 111
C.2.3.2 Individual basic migration profile (original and temporary) 112
C.2.3.3 Profile type 113
C.2.3.4 Profile status 113
C.2.3.5 SS-information 113
C.2.3.6 SS-information response 113
C.2.3.7 SS-migration profile (original) 114
C.2.3.8 SS-migration profile response (temporary) 114
C.2.3.9 SS-profile response status 114
C.2.3.10 SS-profile update indicator 114
C.2.3.11 SS-response status 115
C.2.3.12 SS-status 115
C.2.3.13 SS-type 115
C.2.3.14 SS-CF profiles 115
C.2.3.14.1 SS-CF migration original profile 115
C.2.3.14.2 SS-CF served user migration information PDU 116
C.2.3.14.3 Number of Call forwarding types information element content 117

Annex D (informative): Specification and Description Language (SDL) representation of procedures 118

Annex E (informative): Bibliography 119

Annex F (informative): Change Requests 120

Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (https://ipr.etsi.org/).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This European Standard (EN) has been produced by ETSI Technical Committee TETRA and Critical Communications Evolution (TCCE).

The present document is part 12, sub-part 4 of a multi-part deliverable covering Voice plus Data (V+D), as identified below:

ETSI EN 300 392-1: "General network design";

ETSI EN 300 392-2: "Air Interface (AI)";

ETSI EN 300 392-3: "Interworking at the Inter-System Interface (ISI)";

ETSI ETS 300 392-4: "Gateways basic operation";

ETSI EN 300 392-5: "Peripheral Equipment Interface (PEI)";

ETSI EN 300 392-7: "Security";

ETSI EN 300 392-9: "General requirements for supplementary services";

ETSI EN 300 392-10: "Supplementary services stage 1";

ETSI EN 300 392-11: "Supplementary services stage 2";

ETSI EN 300 392-12: "Supplementary services stage 3";

ETSI EN 300 392-12-1: "Call Identification (CI)";

ETSI ETS 300 392-12-2: "Call Report (CR)";

ETSI EN 300 392-12-3: "Talking Party Identification (TPI)";

ETSI EN 300 392-12-4: "Call Forwarding (CF)";

ETSI ETS 300 392-12-5: "List Search Call (LSC)";

ETSI EN 300 392-12-6: "Call Authorized by Dispatcher (CAD)";

ETSI ETS 300 392-12-7: "Short Number Addressing (SNA)";

ETSI EN 300 392-12-8: "Area Selection (AS)";

ETSI ETS 300 392-12-9: "Access Priority (AP)";

ETSI EN 300 392-12-10: "Priority Call (PC)";

ETSI ETS 300 392-12-11: "Call Waiting (CW)";

ETSI EN 300 392-12-12: "Call Hold (HOLD)";

ETSI EN 300 392-12-13: "Call Completion to Busy Subscriber (CCBS)";

ETSI EN 300 392-12-14: "Late Entry (LE)";

ETSI EN 300 392-12-16: "Pre-emptive Priority Call (PPC)";

ETSI EN 300 392-12-17: "Include Call (IC)";

ETSI EN 300 392-12-18: "Barring of Outgoing Calls (BOC)";

ETSI EN 300 392-12-19: "Barring of Incoming Calls (BIC)";

ETSI EN 300 392-12-20: "Discreet Listening (DL)";

ETSI EN 300 392-12-21: "Ambience Listening (AL)";

ETSI EN 300 392-12-22: "Dynamic Group Number Assignment (DGNA)";

ETSI EN 300 392-12-23: "Call Completion on No Reply (CCNR)";

NOTE 1: Part 3, sub-parts 6 and 7 (Speech format implementation), part 4, sub-part 3 (Data networks gateway), part 10, sub-part 15 (Transfer of control), part 13 (SDL) and part 14 (PICS) of this multi-part deliverable are in status "historical" and are not maintained.

NOTE 2: Some parts are also published as Technical Specifications such as TS 100 392-2 and those may be the latest version of the document.

National transposition dates	
Date of adoption of this EN:	12 July 2016
Date of latest announcement of this EN (doa):	31 October 2016
Date of latest publication of new National Standard or endorsement of this EN (dop/e):	30 April 2017
Date of withdrawal of any conflicting National Standard (dow):	30 April 2017

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the ETSI Drafting Rules (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

Introduction

The supplementary service stage 3 description is preceded by the stage 1 [2] and the stage 2 [3] description of the service, according to the method described in Recommendation ITU-T I.130 [i.4]. The stage 1 description specifies the service from the user's point of view. The stage 2 description identifies the functional capabilities of each SS and the information flows needed to support the supplementary service as specified in its stage 1 description. The present stage 3 description specifies the protocols at the air interface and at the various Inter-System Interfaces (ISI) to support each Supplementary Service.

NOTE: According to Recommendation ITU-T I.130 [i.4], the stage 3 description of any telecommunication service addresses the network implementation aspects. Consequently it comprises two steps: the specifications of all protocols at the various reference points involved in any of the service procedures (notably the service operation) are the first step of the stage 3 description, and the specifications of the functions of the corresponding network entities are its second step. The latter have not been provided since they can be derived from the specification of the functional entity actions in the stage 2 description.

The present document adds parameterisation functionality for a later activation.

1 Scope

The present document specifies the stage 3 description of the Supplementary Services CFU Call Forwarding Unconditional, CFB Call Forwarding on Busy, CFNRy Call Forwarding on No Reply and CFNRc Call Forwarding on Not Reachable for the Terrestrial Trunked Radio (TETRA).

SS-CFU, SS-CFB, SS-CFNRy and SS-CFNRc are supplementary services which allow a served user to have a TETRA network send all or specific incoming calls addressed to the served user's TETRA number to another number.

Man-Machine Interface and charging principles are outside the scope of the present document.

The present document is applicable to Voice plus Data individual call or group call; some parts of the present document are applicable to SDS (Short Data Service); more specifically to the following entities:

- the MS of either the calling user or the called user during an individual call or a group call;
- the originating Switching and Management Infrastructure (SwMI) in an individual call or a group call;
- the group controlling SwMI for a group call;
- the terminating SwMI in an individual call;
- the interworking SwMI for an individual call.

The present document is based on the latest version of ECMA-174 [i.1]. Contrary to ECMA-174 [i.1], the present document does not define Call Deflection supplementary service and the present document distinguishes between the case of No Reply and the case of Not Reachable. Moreover, the present document defines the protocol in cases of group calls and of mobility not covered by ECMA-174 [i.1].

The present document also specifies additional signalling protocol requirements for the support of interactions at the ISI reference point, other supplementary services and ANFs. The present document is applicable to SwMIs that can interconnect to form a TETRA network.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the referenced document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at http://docbox.etsi.org/Reference.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.
