Industrial communication networks – Fieldbus specifications

Part 6-3: Application layer protocol specification –
Type 3 elements (IEC 61158-6-3:2019)

National foreword

This British Standard is the UK implementation of EN IEC 61158-6-3:2019. It is identical to IEC 61158-6-3:2019. It supersedes BS EN 61158-6-3:2014, which will be withdrawn on 25 July 2022.

The UK participation in its preparation was entrusted to Technical Committee GEL/65/3, Industrial communications: process measurement and control, including fieldbus.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

August 2019

ICS 25.040.40; 35.100.70; 35.110

Supersedes EN 61158-6-3:2014 and all of its
amendments and corrigenda (if any)

English Version

**Industrial communication networks - Fieldbus specifications -
Part 6-3: Application layer protocol specification - Type 3
elements
(IEC 61158-6-3:2019)**

Réseaux de communication industriels - Spécifications des
bus de terrain - Partie 6-3: Spécification du protocole de la
couche application - Éléments de type 3
(IEC 61158-6-3:2019)

Industrielle Kommunikationsnetze - Feldbusse - Teil 6-3:
Protokollspezifikation des Application Layer
(Anwendungsschicht) - Typ 3-Elemente
(IEC 61158-6-3:2019)

This European Standard was approved by CENELEC on 2019-07-25. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

The text of document 65C/948/FDIS, future edition 4 of IEC 61158-6-3, prepared by SC 65C "Industrial networks" of IEC/TC 65 "Industrial-process measurement, control and automation" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 61158-6-3:2019.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2020-04-25
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2022-07-25

This document supersedes EN 61158-6-3:2014 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Endorsement notice

The text of the International Standard IEC 61158-6-3:2019 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

- IEC 61158-1:2019 NOTE Harmonized as EN IEC 61158-1:2019 (not modified)
IEC 61784-1 NOTE Harmonized as EN IEC 61784-1
IEC 61784-2 NOTE Harmonized as EN IEC 61784-2

CONTENTS

FOREWORD	14
INTRODUCTION	16
1 Scope	17
1.1 General	17
1.2 Specifications	18
1.3 Conformance	18
2 Normative references	18
3 Terms, definitions, abbreviations, symbols and conventions	19
3.1 Referenced terms and definitions	19
3.1.1 ISO/IEC 7498-1 terms	19
3.1.2 ISO/IEC 8822 terms	19
3.1.3 ISO/IEC 9545 terms	19
3.1.4 ISO/IEC 8824-1 terms	20
3.1.5 Fieldbus Data Link Layer terms	20
3.2 Additional definitions	20
3.3 Abbreviations and symbols	23
3.4 Conventions	25
3.4.1 General concept	25
3.4.2 Abstract syntax conventions	25
3.4.3 Convention for the encoding of reserved bits and octets	26
3.4.4 Conventions for the common coding s of specific field octets	26
3.5 Conventions used in state machines	27
3.5.1 State machine conventions	27
4 FAL syntax description	29
4.1 APDU abstract syntax	29
4.2 Data types	34
4.2.1 Notation for the Boolean type	34
4.2.2 Notation for the Integer type	34
4.2.3 Notation for the Unsigned type	34
4.2.4 Notation for the Floating Point type	35
4.2.5 Notation for the OctetString type	35
4.2.6 Notation for VisibleString type	35
4.2.7 Notation for BinaryDate type	35
4.2.8 Notation for TimeOfDay type	35
4.2.9 Notation for TimeDifference type	35
4.2.10 Notation for Network Time type	35
4.2.11 Notation for Network Time Difference type	35
5 Transfer syntax	35
5.1 Coding of basic data types	35
5.1.1 Encoding of a Boolean value	35
5.1.2 Encoding of an Integer value	36
5.1.3 Encoding of an Unsigned value	36
5.1.4 Encoding of a Floating-Point value	36
5.1.5 Encoding of a Visible String value	36
5.1.6 Encoding of an Octet String value	36
5.1.7 Encoding of a BinaryDate value	36

5.1.8	Encoding of a TimeOfDay with and without date indication value	36
5.1.9	Encoding of a Time Difference with and without date indication value	37
5.1.10	Encoding of a Network Time value.....	37
5.1.11	Encoding of a Network Time Difference value.....	37
5.1.12	Encoding of a Null value	37
5.2	Coding section related to data exchange PDUs.....	37
5.2.1	General	37
5.2.2	Coding of the field Outp_Data.....	37
5.2.3	Coding of the field Inp_Data	37
5.3	Coding section related to slave diagnosis PDUs	37
5.3.1	Coding of the field Station_status_1	37
5.3.2	Coding of the field Station_status_2	38
5.3.3	Coding of the field Station_status_3	39
5.3.4	Coding of the field Diag_Master_Add.....	39
5.3.5	Coding of the field Ident_Number.....	39
5.3.6	Coding of the field Header_Octet.....	39
5.3.7	Coding of the field Alarm_Type.....	40
5.3.8	Coding of the field Status_Type	41
5.3.9	Coding of the field Slot_Number	41
5.3.10	Coding of the field Alarm_Specifier.....	41
5.3.11	Coding of the field Status_Specifier	42
5.3.12	Coding of the field Diagnosis_User_Data.....	43
5.3.13	Coding of the field Modul_Status_Array	43
5.3.14	Coding of the field Identifier_Diagnosis_Data_Array	44
5.3.15	Coding of the field Identifier_Number.....	45
5.3.16	Coding of the field Channel_Number	45
5.3.17	Coding of the field Type_of_Diagnosis.....	46
5.3.18	Coding of the field Revision_Number	46
5.3.19	Coding of the field Publisher_Address	47
5.3.20	Coding of the field Publisher_Status	47
5.3.21	Coding of the field RedSpecifier	47
5.3.22	Coding of the field Function	47
5.3.23	Coding of the field Red_Status1	48
5.3.24	Coding of the field Red_Status2	48
5.3.25	Coding of the field Red_Status3	49
5.4	Coding section related to parameterization PDU	49
5.4.1	Coding of the field Station_status	49
5.4.2	Coding of the field WD_Fact_1	50
5.4.3	Coding of the field WD_Fact_2	50
5.4.4	Coding of the field min_TSDR.....	50
5.4.5	Coding of the field Group_Ident	50
5.4.6	Coding of the field User_Prm_Data_Element	51
5.4.7	Coding of the field DPV1_Status_1	51
5.4.8	Coding of the field DPV1_Status_2	52
5.4.9	Coding of the field DPV1_Status_3.....	52
5.4.10	Coding of the field Structure_Length.....	53
5.4.11	Coding of the field Structure_Type.....	53
5.4.12	Coding of the field Version.....	53
5.4.13	Coding of the field Publisher_Addr.....	54

5.4.14	Coding of the field Publisher_Length	54
5.4.15	Coding of the field Sample_Offset	54
5.4.16	Coding of the field Sample_Length	54
5.4.17	Coding of the Dest_Slot_Number.....	54
5.4.18	Coding of the Offset_Data_Area	54
5.4.19	Coding of the field T _{BASE_DP}	54
5.4.20	Coding of the field T _{DP}	55
5.4.21	Coding of the field T _{MAPC}	55
5.4.22	Coding of the field T _{BASE_IO}	55
5.4.23	Coding of the field T _I	55
5.4.24	Coding of the field T _O	55
5.4.25	Coding of the field T _{DX}	55
5.4.26	Coding of the field T _{PLL_W}	55
5.4.27	Coding of the field T _{PLL_D}	55
5.4.28	Coding of the field Specifier.....	55
5.4.29	Coding of the field Function	55
5.4.30	Coding of the field Properties	56
5.4.31	Coding of the field Output Hold Time	56
5.4.32	Coding of the field Clock Sync Interval	56
5.4.33	Coding of the field CS Delay Time	56
5.5	Coding section related to configuration PDUs	57
5.5.1	Coding of the field Cfg_Identifier.....	57
5.5.2	Coding of the field Special_Cfg_Identifier	57
5.5.3	Coding of the fields Length_Octet.....	58
5.5.4	Coding of the field Manufacturer_Specific_Data.....	58
5.5.5	Coding of the field Extended_Length_Octet	58
5.5.6	Coding of the field Data_Type	59
5.6	Coding section related to global control PDUs	59
5.6.1	Coding of the field Control_Command.....	59
5.6.2	Coding of the field Group_Select	60
5.7	Coding section related to clock-value-PDUs.....	61
5.7.1	Coding of the field Clock_value_time_event.....	61
5.7.2	Clock_value_previous_TE	61
5.7.3	Coding of the field Clock_value_status1	61
5.7.4	Coding of the field Clock_value_status2	61
5.8	Coding section related to function identification and errors	62
5.8.1	Coding of the field Function_Num	62
5.8.2	Coding of the field Error_Decode	64
5.8.3	Coding of the field Error_Code_1	64
5.8.4	Coding of the field Error_Code_2	65
5.9	Coding section related to master diagnosis PDU	65
5.9.1	Coding of the field MDiag_Identifier	65
5.9.2	Coding of the field System_Diagnosis	66
5.9.3	Coding of the field USIF_State.....	66
5.9.4	Coding of the field Hardware_Release_DP	67
5.9.5	Coding of the field Firmware Release_DP	67
5.9.6	Coding of the field Hardware_Release_User	67
5.9.7	Coding of the field Firmware Release_User	67
5.9.8	Coding of the field Data_Transfer_List.....	67

5.10 Coding section related to upload/download/act para PDUs.....	68
5.10.1 Coding of the field Area_Code_UpDownload	68
5.10.2 Coding of the field Timeout.....	68
5.10.3 Coding of the field Max_Len_Data_Unit.....	68
5.10.4 Coding of the field Add_Offset.....	68
5.10.5 Coding of the field Data	68
5.10.6 Coding of the field Data_Len	68
5.10.7 Coding of the field Area_CodeActBrct.....	69
5.10.8 Coding of the field Area_CodeAct.....	69
5.10.9 Coding of the field Activate	69
5.11 Coding section related to the bus parameter set	70
5.11.1 Coding of the field Bus_Para_Len.....	70
5.11.2 Coding of the field DL_Add	70
5.11.3 Coding of the field Data_rate	70
5.11.4 Coding of the fields T _{SL} , min T _{SDR} , max T _{SDR}	70
5.11.5 Coding of the fields T _{QUI} , T _{SET} , G, HSA, max_retry_limit	71
5.11.6 Coding of the field T _{TR} (Target Token Rotation time)	71
5.11.7 Coding of the field Bp_Flag (Busparameter flag).....	71
5.11.8 Coding of the field Min_Slave_Interval.....	71
5.11.9 Coding of the field Poll_Timeout	71
5.11.10 Coding of the field Data_Control_Time	71
5.11.11 Coding of the field Alarm_Max	71
5.11.12 Coding of the field Max_User_Global_Control.....	72
5.11.13 Coding of the field Master_User_Data_Len	72
5.11.14 Coding of the field Master_Class2_Name	72
5.11.15 Coding of the field Master_User_Data	72
5.11.16 Coding of the field T _{CT}	72
5.11.17 Coding of the field maxT _{SH}	72
5.12 Coding section related to the slave parameter set.....	72
5.12.1 Coding of the field Slave_Para_Len	72
5.12.2 Coding of the field SI_Flag (slave flag)	72
5.12.3 Coding of the field Slave_Type	73
5.12.4 Coding of the field Max_Diag_Data_Len	73
5.12.5 Coding of the field Max_Alarm_Len	73
5.12.6 Coding of the field Max_Channel_Data_Length	73
5.12.7 Coding of the field Diag_Upd_Delay	74
5.12.8 Coding of the field Alarm_Mode	74
5.12.9 Coding of the field Add_SI_Flag	74
5.12.10 Coding of the field MS1_Timeout	74
5.12.11 Coding of the field Prm_Data_Len	74
5.12.12 Coding of the field Prm_Data	74
5.12.13 Coding of the field Cfg_Data_Len	75
5.12.14 Coding of the field Cfg_Data	75
5.12.15 Coding of the field Add_Tab_Len	75
5.12.16 Coding of the field Number_ofEntries.....	75
5.12.17 Coding of the field Add_Tab_Entry_Header	75
5.12.18 Coding of the field I/O_Data_Length	75
5.12.19 Coding of the field I/O_Config_Address	75
5.12.20 Coding of the field Host_Address.....	75

5.12.21	Coding of the field Slave_User_Data_Len.....	76
5.12.22	Coding of the field Slave_User_Data	76
5.12.23	Coding of the field Ext_Prm_Data_Len	76
5.12.24	Coding of the field Ext_Prm_Data	76
5.13	Coding section related to statistic counters	76
5.13.1	Coding of the field DLPDU_sent_count and SD_count	76
5.13.2	Coding of the field Error_count and SD_error_count	76
5.14	Coding section related to set slave address PDU	76
5.14.1	Coding of the field New_Slave_Add	76
5.14.2	Coding of the field No_Add_Change	76
5.14.3	Coding of the field Rem_Slave_Data	76
5.15	Coding section related to initiate/abort PDUs	77
5.15.1	Coding of the field Features_Supported_1	77

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**INDUSTRIAL COMMUNICATION NETWORKS –
FIELDBUS SPECIFICATIONS –****Part 6-3: Application layer protocol specification –
Type 3 elements****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

Attention is drawn to the fact that the use of the associated protocol type is restricted by its intellectual-property-right holders. In all cases, the commitment to limited release of intellectual-property-rights made by the holders of those rights permits a layer protocol type to be used with other layer protocols of the same type, or in other type combinations explicitly authorized by its intellectual-property-right holders.

NOTE Combinations of protocol types are specified in IEC 61784-1 and IEC 61784-2.

International Standard IEC 61158-6-3 has been prepared by subcommittee 65C: Industrial networks, of IEC technical committee 65: Industrial-process measurement, control and automation.

This fourth edition cancels and replaces the third edition published in 2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- corrected substitutions in Table 4;
- corrections in 5.3.14;
- corrections in 5.5.6;
- corrections in 5.17.15;
- corrections in 5.17.16.2;
- spelling and grammar.

The text of this International standard is based on the following documents:

FDIS	Report on voting
65C/948/FDIS	65C/956/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 61158 series, published under the general title *Industrial communication networks – Fieldbus specifications*, can be found on the IEC web site.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under <<http://webstore.iec.ch>> in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

INTRODUCTION

This part of IEC 61158 is one of a series produced to facilitate the interconnection of automation system components. It is related to other standards in the set as defined by the “three-layer” fieldbus reference model described in IEC 61158-1.

The application protocol provides the application service by making use of the services available from the data-link or other immediately lower layer. The primary aim of this document is to provide a set of rules for communication expressed in terms of the procedures to be carried out by peer application entities (AEs) at the time of communication. These rules for communication are intended to provide a sound basis for development in order to serve a variety of purposes:

- as a guide for implementors and designers;
- for use in the testing and procurement of equipment;
- as part of an agreement for the admittance of systems into the open systems environment;
- as a refinement to the understanding of time-critical communications within OSI.

This document is concerned, in particular, with the communication and interworking of sensors, effectors and other automation devices. By using this document together with other standards positioned within the OSI or fieldbus reference models, otherwise incompatible systems may work together in any combination.

INDUSTRIAL COMMUNICATION NETWORKS – FIELDBUS SPECIFICATIONS –

Part 6-3: Application layer protocol specification – Type 3 elements

1 Scope

1.1 General

The Fieldbus Application Layer (FAL) provides user programs with a means to access the fieldbus communication environment. In this respect, the FAL can be viewed as a “window between corresponding application programs.”

This part of IEC 61158 provides common elements for basic time-critical and non-time-critical messaging communications between application programs in an automation environment and material specific to Type 3 fieldbus. The term “time-critical” is used to represent the presence of a time-window, within which one or more specified actions are required to be completed with some defined level of certainty. Failure to complete specified actions within the time window risks failure of the applications requesting the actions, with attendant risk to equipment, plant and possibly human life.

This International Standard defines in an abstract way the externally visible behavior provided by the Type 3 fieldbus application layer in terms of

- a) the abstract syntax defining the application layer protocol data units conveyed between communicating application entities,
- b) the transfer syntax defining the application layer protocol data units conveyed between communicating application entities,
- c) the application context state machine defining the application service behavior visible between communicating application entities; and
- d) the application relationship state machines defining the communication behavior visible between communicating application entities.

The purpose of this document is to define the protocol provided to

- a) define the wire-representation of the service primitives specified in IEC 61158-5-3, and
- b) define the externally visible behavior associated with their transfer.

This document specifies the protocol of the Type 3 fieldbus application layer, in conformance with the OSI Basic Reference Model (ISO/IEC 7498-1) and the OSI Application Layer Structure (ISO/IEC 9545).

FAL services and protocols are provided by FAL application-entities (AE) contained within the application processes. The FAL AE is composed of a set of object-oriented Application Service Elements (ASEs) and a Layer Management Entity (LME) that manages the AE. The ASEs provide communication services that operate on a set of related application process object (APO) classes. One of the FAL ASEs is a management ASE that provides a common set of services for the management of the instances of FAL classes.

Although these services specify, from the perspective of applications, how request and responses are issued and delivered, they do not include a specification of what the requesting and responding applications are to do with them. That is, the behavioral aspects of the applications are not specified; only a definition of what requests and responses they can
