## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 126, *Tobacco and tobacco products*, Subcommittee SC 2, *Leaf tobacco*.

This third edition cancels and replaces the second edition (ISO 4874:2000), of which it constitutes a minor revision.

The changes compared to the previous edition are as follows:

- a table of contents has been added;
- the mandatory Normative references clause ([Clause 2](#)) has been added and the subsequent clauses have been renumbered
- definitions in [Clause 3](#) have been editorially revised for clarity.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

# Tobacco — Sampling of batches of raw material — General principles

## 1 Scope

This document specifies the general principles to be applied when sampling batches of raw tobacco in order to assess either

- the mean value of one or more of its characteristics, or
- the heterogeneity of one or more of its characteristics.

Manufactured tobacco products, including products intended for sale or distribution, are specifically not included in the scope of this document.

This document is applicable to the sampling of batches of raw tobacco of the following types:

- a) leaf tobacco:
  - 1) flue cured;
  - 2) air cured;
  - 3) sun cured;
  - 4) fire cured;
- b) pretreated raw tobacco:
  - 1) which has undergone fermentation (in packages not intended for retail or wholesale sales or distribution, in bulk, in chambers);
  - 2) which has been partially or completely stemmed;
  - 3) which is in the form of stems;
  - 4) which is in the form of waste and remnants;
  - 5) which has been reconstituted in the form of strips.

## 2 Normative references

There are no normative references in this document.

## 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org/>
