

**SECTION III**  
Rules for Construction of  
Nuclear Facility Components

**2021** ASME Boiler and  
Pressure Vessel Code  
An International Code

**APPENDICES**

Markings such as “ASME,” “ASME Standard,” or any other marking including “ASME,” ASME logos, or the ASME Single Certification Mark shall not be used on any item that is not constructed in accordance with all of the applicable requirements of the Code or Standard. Use of the ASME Single Certification Mark requires formal ASME certification; if no certification program is available, such ASME markings may not be used. (For Certification and Accreditation Programs, see <https://www.asme.org/certification-accreditation>.)

Items produced by parties not formally possessing an ASME Certificate may not be described, either explicitly or implicitly, as ASME certified or approved in any code forms or other document.

AN INTERNATIONAL CODE

# 2021 ASME Boiler & Pressure Vessel Code

2021 Edition

July 1, 2021

## RULES FOR CONSTRUCTION OF NUCLEAR FACILITY COMPONENTS

### Appendices

ASME Boiler and Pressure Vessel Committee  
on Construction of Nuclear Facility Components

The American Society of  
Mechanical Engineers

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: July 1, 2021

This international code or standard was developed under procedures accredited as meeting the criteria for American National Standards and it is an American National Standard. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

The endnotes and preamble in this document (if any) are part of this American National Standard.

ASME Collective Membership Mark

ASME Single Certification Mark

I-9.0	Tabulated Values of $S_a$ , ksi, From Figures I-9.1 Through I-9.4 .....	2
I-9.0M	Tabulated Values of $S_a$ , MPa, From Figures I-9.1M Through I-9.4M .....	3
I-9.1	Tabulated Values of $S_a$ , ksi (MPa), From Figures I-9.1 and I-9.1M .....	6
I-9.2	Tabulated Values of $S_a$ , ksi (MPa), From Figures I-9.2 and I-9.2M .....	9
I-9.5	Tabulated Values of $S_a$ , ksi (MPa), From Figures I-9.5 and I-9.5M .....	16
I-9.6	Tabulated Values of $S_a$ , ksi (MPa), for Grade 9 Titanium From Figures I-9.6 and I-9.6M .....	19
I-9.7	Tabulated Values of $S_a$ , ksi (MPa), From Figure I-9.7 .....	21
I-9.8	Tabulated Values of $S_a$ , ksi, From Figure I-9.8 .....	24
I-9.8M	Tabulated Values of $S_a$ , MPa, From Figure I-9.8M .....	25
II-2440-1	Stress Intensification Increase Factor .....	37
V-1000-1	Guide for Completing Manufacturer's Data Report, Form N-2 .....	47
V-1000	Guide for Preparation of Data Report Forms .....	76
VI-1132-1	Maximum Size of Nonrelevant Indications and Acceptable Rounded Indications — Examples Only .....	81
XI-3221.1-1	Gasket Materials and Contact Facings .....	96
XI-3221.1-2	Effective Gasket Width .....	98
XI-3230-1	Moment Arms for Flange Loads .....	99
XI-3240-1	Flange Factors in Formula Form .....	100
XIII-2600-1	Classification of Stresses in Vessels for Some Typical Cases .....	121
XIII-2600-2	Classification of Stresses in Piping, Typical Cases .....	122
XIII-3110-1	Primary Stress Intensity Limits .....	124

XIII-3200-1	Collapse Load Factors	126
XIII-3450-1	Values of $m$ , $n$ , and $T_{max}$ for Various Classes of Permitted Materials	128
XIII-I-1	Cross-Reference List for NB-3200 and Appendix XIII	137
XVIII-1110-1	Superheat Correction Factor, $K_{sh}$	139
XVIII-1110-1M	Superheat Correction Factor, $K_{sh}$	141
XVIII-1110(a)-1	Molecular Weights of Gases and Vapors	143
XXII-1200-1	Values of $\Delta$ for Junctions at the Large Cylinder for $\alpha \leq 60$ deg	152
S2-1	Design Specification — Divisions 1 Through 3 and 5	163
S2-2	Design Report — Divisions 1, 3, and 5 (Excluding Nonmetallic CSS)	165
S2-3	Load Capacity Data Sheet or Certified Design Report Summary — Divisions 1 and 5	167
S2-4	Fabrication Specification — Division 3	168
S2-5	Overpressure Protection Report — Divisions 1, 2, and 5	169
S2-6	Construction Specification, Design Drawings, and Design Report — Divisions 2 and 5 (Nonmetallic CSS)	170
XXIV-1000	Standard Units for Use in Equations	176
XXVI-2221-1	Certification Requirements for Polyethylene Compound	180
XXVI-2511-1	Minimum Quality Testing Requirements for Polyethylene Compound Lots	186
XXVI-2512-1	Minimum Quality Testing Requirements for Natural Compound Lots	187
XXVI-2513-1	Testing Requirements for Pigment Concentrate Compound Lots	187
XXVI-2520(a)-1	Minimum Quality Testing Requirements for Polyethylene Source Material	188
XXVI-2520(a)-2	Minimum Quality Testing Requirements for Polyethylene Material — Pipe	188
XXVI-3131-1(a)	Long-Term Allowable Stress, $S$ , for Polyethylene, psi	197
XXVI-3131-1M(a)	Long-Term Allowable Stress, $S$ , for Polyethylene, MPa	197
XXVI-3131-1(b)	Elevated Temperature Allowable Stress, $S$ , for Polyethylene, psi (MPa)	198
XXVI-3132-1	Geometric Shape Ratings (GSR)	198
XXVI-3133-1	$S_A$ , Allowable Secondary Stress Limit, psi	199
XXVI-3133-1M	$S_A$ , Allowable Secondary Stress Limit, MPa	199
XXVI-3210-1	Maximum Allowable Ring Deflection, $\Omega_{max}$	199
XXVI-3210-2	Soil Support Factor, $F_S$	200
XXVI-3210-3	Modulus of Elasticity of Polyethylene Pipe, $E_{pipe}$ , psi	200
XXVI-3210-3M	Modulus of Elasticity of Polyethylene Pipe, $E_{pipe}$ , MPa	200
XXVI-3220-1	Allowable Sidewall Compression Stress, $S_{comp}$ (psi)	201
XXVI-3220-1M	Allowable Sidewall Compression Stress, $S_{comp}$ (MPa)	201
XXVI-3221.2-1	Ovality Correction Factor, $f_o$	201
XXVI-3223-1	Design and Service Level Longitudinal Stress Factor, $K'$	201
XXVI-3223-2	Short Duration (5 min) Allowable Longitudinal Tensile Stress	201
XXVI-3311-1	Stress Indices, Flexibility, and Stress Intensification Factors for PE Piping Components	202
XXVI-4334-1	Butt Fusing Procedure Specification Variables	211
XXVI-4334-2	Electrofusion Procedure Specification Variables	212
XXVI-4521.1-1	Torque Increments for Flanged Joints	215
XXVI-I-100-1	PE Standards and Specifications Referenced in Text	228
XXVI-IIA-421	Requirements of an Ultrasonic Examination Procedure for HDPE Techniques	230
XXVI-IIB-421.1-1	Requirements of a Microwave Examination Procedure for HDPE Techniques	231
XXVI-A-110-1	Fusion Standards and Specifications Referenced in Text	235
XXVI-C-100-1	Seismic Strain Limits	239
XXVI-E-1	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 40/STD Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 25 ksi Allowable Stress	244
XXVI-E-1M	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 40/STD Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 172 MPa Allowable Stress	245
XXVI-E-2	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 80/XS Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 25 ksi Allowable Stress	246

XXVI-E-2M	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 80/XS Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 172 MPa Allowable Stress .....	247
XXVI-E-3	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 40/STD Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 35 ksi Allowable Stress .....	248
XXVI-E-3M	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 40/STD Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 241 MPa Allowable Stress .....	249
XXVI-E-4	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 80/XS Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 35 ksi Allowable Stress .....	250
XXVI-E-4M	Nominal Bolt Torque Values and Maximum Design Pressure for Schedule 80/XS Class 150 Flat Face Metallic-to-PE Flanged Joints, Bolting Material With 241 MPa Allowable Stress .....	251
XXVI-E-5	Nominal Bolt Torque Values and Maximum Design Pressure for PE-to-PE Flanged Joints, Bolting Material With 25 ksi Allowable Stress .....	252
XXVI-E-5M	Nominal Bolt Torque Values and Maximum Design Pressure for PE-to-PE Flanged Joints, Bolting Material With 172 MPa Allowable Stress .....	253
XXVI-E-6	Nominal Bolt Torque Values and Maximum Design Pressure for PE-to-PE Flanged Joints, Bolting Material With 35 ksi Allowable Stress .....	254
XXVI-E-6M	Nominal Bolt Torque Values and Maximum Design Pressure for PE-to-PE Flanged Joints, Bolting Material With 241 MPa Allowable Stress .....	255
A-5240-1	.....	276
A-9210(d)-1	Interaction Equations for Common Beam Shapes .....	300
A-9521(b)-1	.....	302
D-1210-1	Suggested Minimum Preheat Temperatures .....	329
L-3212-1	Trial Flange Thickness and Area of Bolting for Various Groups of Assemblies and Flange Categories .....	354
L-3240-1	Summary of Applicable Equations for Different Groups of Assemblies and Different Categories of Flanges .....	357
N-1211(a)-1	Horizontal Design Response Spectra Relative Values of Spectrum Amplification Factors for Control Points .....	367
N-1211(b)-1	Vertical Design Response Spectra Relative Values of Spectrum Amplification Factors for Control Points .....	369
N-1225.1.1(b)-1	Minimum Support Load Factor .....	379
N-1226-1	Suggested Frequencies, Hz, for Calculation of Ground and Floor Response Spectra ...	381
N-1230-1	Damping Values .....	389
N-1311-1	Added Mass for Lateral Acceleration of Structures in a Fluid Reservoir .....	394
N-1311-2	Guidelines for Damping of Flow-Induced Vibration .....	396
N-1324.2(a)-1	Semiempirical Correlations for Predicting Resonant Vortex-Induced Vibration Amplitude .....	400
Q-1180-1	Allowable Design Stress for Clamp Connections .....	443
T-1222-1	Branch/Run Size Combinations .....	456
U-1600-1	Summary of Requirements .....	459
U-1610-1	Materials for Pump Internal Items for Class 1, 2, and 3 Pumps .....	468
CC-3120-1	Correlation of Service Loadings and Stress Limit Coefficients .....	551
EE-1150-1	Examples of Triaxiality Factor Calculations .....	560
EE-1250-1	Factors for Specified Strain Rates .....	565
FF-1122-1	Permitted Material Specifications and Products .....	568
GG-1100-1	Minimum Thickness for Pipe Bends .....	571
HH-1120-1	Summary of Requirements .....	577
HH-1312-1	Allowable Stress Values, <i>S</i> , for Material for Internal and External Items (U.S. Customary Units) .....	591
HH-1312-1M	Allowable Stress Values, <i>S</i> , for Material for Internal and External Items (SI Units) ....	594
KK-2400-1	Additional Metallic Component Requirements .....	608

KK-8200-1	Additional Core Support Structures Requirements .....	617
KK-10300-1	Additional Graphite Core Component Requirements .....	625
LL-2112.3-1	Applicability of Limits for Division 3 Components .....	629
NN-1000	Guide for Completing <a href="#">Form NR-10</a> .....	648

**FORMS**

N-1	Certificate Holder's Data Report for Nuclear Vessels* .....	42
N-1A	Certificate Holder's Data Report for Nuclear Vessels* .....	44
N-2	Certificate Holder's Data Report for Identical Nuclear Parts .....	45
N-2A	Certificate Holder's Data Report for Identical Appurtenances .....	48
N-3	Owner's Data Report for Nuclear Power Plant Components* .....	50
N-5	Certificate Holder's Data Report for Installation or Shop Assembly or Nuclear Power Plant Components, Supports, and Appurtenances .....	52
N-6	Certificate Holders' Data Report for Storage Tanks* .....	54
NPP-1	Certificate Holder's Data Report for Fabricated Nuclear Piping Subassemblies .....	56
NPV-1	Certificate Holder's Data Report for Nuclear Pumps or Valves* .....	58
NV-1	Certificate Holder's Data Report for Pressure or Vacuum Relief Valves* .....	60
NCS-1	Certificate Holder's Data Report for Core Support Structures* .....	62
NF-1	Certificate Holder's Data Report for Supports* .....	63
NM-1	Certificate Holder's Data Report for Tubular Products and Fittings Welded With Filler Metal* .	65
NS-1	Certificate Holder's Certificate of Conformance for Welded Supports* .....	66
C-1	Certificate Holder's Data Report for Concrete Reactor Vessels and Containments* .....	68
G-1	GC Certificate Holder's Data Report for Graphite Core Assemblies .....	70
G-2	GC or Graphite Quality System Certificate Holder's Data Report for Machined Graphite Core Components .....	72
G-4	GC or Graphite Quality System Certificate Holder's or GQSC Holder's Data Report for Installation of Graphite Core Components .....	74
S4-1	Design Specification (Div. 1, 2, and 5) .....	173
S4-2	Design Report .....	173
S4-3	Overpressure Protection Report (Div. 1, 2, and 5) .....	174
S4-4	Design Specification (Div. 3) .....	174
S4-5	Fabrication Specification (Div. 3) .....	175
S4-6	Construction Specification (Div. 2) .....	175
NM(PE)-2	Data Report for Nonmetallic Batch-Produced Products Requiring Fusing .....	234
NR-10	Report For Repairs to Stamped Components .....	646

## LIST OF SECTIONS

### SECTIONS

- I Rules for Construction of Power Boilers
  
- II Materials
  - Part A — Ferrous Material Specifications
  - Part B — Nonferrous Material Specifications
  - Part C — Specifications for Welding Rods, Electrodes, and Filler Metals
  - Part D — Properties (Customary)
  - Part D — Properties (Metric)
  
- III Rules for Construction of Nuclear Facility Components
  - Subsection NCA — General Requirements for Division 1 and Division 2
  - Appendices
  - Division 1
    - Subsection NB — Class 1 Components
    - Subsection NCD — Class 2 and Class 3 Components\*
    - Subsection NE — Class MC Components
    - Subsection NF — Supports
    - Subsection NG — Core Support Structures
  - Division 2 — Code for Concrete Containments
  - Division 3 — Containment Systems for Transportation and Storage of Spent Nuclear Fuel and High-Level Radioactive Material
  - Division 5 — High Temperature Reactors
  
- IV Rules for Construction of Heating Boilers
  
- V Nondestructive Examination
  
- VI Recommended Rules for the Care and Operation of Heating Boilers
  
- VII Recommended Guidelines for the Care of Power Boilers
  
- VIII Rules for Construction of Pressure Vessels
  - Division 1
  - Division 2 — Alternative Rules
  - Division 3 — Alternative Rules for Construction of High Pressure Vessels
  
- IX Welding, Brazing, and Fusing Qualifications
  
- X Fiber-Reinforced Plastic Pressure Vessels
  
- XI Rules for Inservice Inspection of Nuclear Power Plant Components
  - Division 1 — Rules for Inspection and Testing of Components of Light-Water-Cooled Plants
  - Division 2 — Requirements for Reliability and Integrity Management (RIM) Programs for Nuclear Power Plants
  
- XII Rules for Construction and Continued Service of Transport Tanks
  
- XIII Rules for Overpressure Protection

---

\* In the 2021 Edition, Subsections NC and ND have been incorporated into one publication, Subsection NCD (BPVC.III.1.NCD), Class 2 and Class 3 Components.
