BS EN 50632-2-4:2016

BSI Standards Publication

Electric motor-operated tools — Dust measurement procedure

Part 2-4: Particular requirements for sanders other than disk type

National foreword

This British Standard is the UK implementation of EN 50632-2-4:2016.

The UK participation in its preparation was entrusted to Technical Committee CPL/116, Safety of motor-operated electric tools.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

Electric motor-operated tools - Dust measurement procedure - Part 2-4: Particular requirements for sanders other than disk type

Outils électriques à moteur - Procédure de mesure de la poussière - Partie 2-4: Exigences particulières pour les ponceuses autres que du type à disque

Motorbetriebene Elektrowerkzeuge - Staubmessverfahren -Teil 2-4: Besondere Anforderungen für Schleifer außer Tellerschleiferb

This European Standard was approved by CENELEC on 2016-05-03. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

This document (EN 50632-2-4:2016) has been prepared by CLC/TC 116 "Safety of motor-operated electric tools".

The following dates are fixed:

latest date by which this document has to be implemented at national level by publication of an identical national standard or by endorsement
latest date by which the national standards conflicting with this document have to be withdrawn
latest date by which the national standards conflicting with this

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

This European Standard is divided into three parts:

Part 1: General requirements for the dust measurement which are common to electric motoroperated tools (for the purpose of this standard referred to simply as tools);

Part 2 or 3: Requirements for the dust measurement for particular types of tools, which either supplement or modify the requirements given in Part 1 to account for the particular characteristics of these specific tools.

This Part 2 is to be used in conjunction with EN 50632-1:2015.

This Part 2 supplements or modifies the corresponding clauses in EN 50632-1:2015.

This Part 2 was developed to set out requirements for the measurement of the concentration for inhalable and respirable dust emitted by sanders.

Where a particular subclause of Part 1 is not mentioned in this Part 2, that subclause applies as far as reasonable. When this standard states "addition", "modification" or "replacement", the relevant text in Part 1 is to be adapted accordingly.

Subclauses, tables and figures which are additional to those in Part 1 are numbered starting from 101.

This European Standard has been drafted in accordance with the CEN/CENELEC Internal Regulations, Part 3.

The following print types are used:

- requirements proper: in roman type;
- test specifications: in italic type:
- explanatory matter: in smaller roman type.

The terms defined in Clause 3 are printed in **bold typeface**.

EN 50632-2-4:2016 (E)

1 Scope

This clause of Part 1 is applicable except as follows:

Addition:

This part of EN 50632 applies to **sanders** with the exception of all types of rotating disc-type **sanders**, which are covered by EN 50632-2-3.

2 Normative references

This clause of Part 1 is applicable except as follows:

EN 12859:2011, Gypsum blocks — Definitions, requirements and test methods

3 Terms and definitions

This clause of Part 1 is applicable except as follows:

3.101

sander

tool intended to remove surface material using an abrasive medium

3.102

orbital sander

sander equipped with a plate, which performs an orbital oscillating motion parallel to the work surface

3.103

random orbit sander

sander equipped with a plate positioned eccentrically on the driving spindle which can rotate freely around its axis parallel to the work surface

3.104

reciprocating sander

sander equipped with a plate, which performs a reciprocating motion parallel to the work surface

3.105

belt sander

sander equipped with an endless abrasive belt

4 Test procedure

This clause of Part 1 is applicable except as follows:

4.3 Operating conditions

Addition:

Orbital sanders and **random orbit sanders** intended to process mineral materials are tested under load observing the conditions shown in Table 101.
