Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 83, *Sports and other recreational facilities and equipment*.

This third edition cancels and replaces the second edition (ISO 7152:1997), which has been technically revised. It also incorporates the Amendment ISO 7152:1997/Amd.1:2006.

The main changes are as follows:

- addition of new terms;
- complete revision.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

[Annex A](#) provides figures to better illustrate some of the terms defined.

Camping tents and caravan awnings — Vocabulary

1 Scope

This document gives a list of the most frequent terms relating to camping tents and caravan awnings together with some definitions.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

3.1

awning

closable structure intended to be fixed to a stationary vehicle or to stand free of the vehicle

Note 1 to entry: Structures which are designed as awnings are considered as awnings even if they are free-standing, such as awning variations for caravans and motorised vehicles.

Note 2 to entry: See [Figure A.57](#).

3.2

tent

pieces of materials fixed together

3.3

hoop tent

tent ([3.2](#)) made of one or more *hoops* ([3.44](#))

Note 1 to entry: See [Figure A.3](#) and [Figure A.19](#).

3.4

hoop awning

poled awning

awning ([3.1](#)) made of one or more *hoops* ([3.44](#))

3.5

frame tent

tent ([3.2](#)) of which the assembly consists of predominantly rigid poles

Note 1 to entry: The rigid poles are usually made of steel, aluminium, fibre glass, *inflatable tubes* ([3.46](#)) or wood.

Note 2 to entry: See [Figure A.8](#) and [Figure A.9](#).

3.6

frame awning

awning ([3.1](#)) of which the assembly consists of predominantly rigid poles

Note 1 to entry: The rigid poles are usually made of steel, aluminium, fibre glass, *inflatable tubes* ([3.46](#)) or wood.
