About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD.....	12
INTRODUCTION.....	14
1 Scope.....	15
2 Normative references	15
3 Terms, definitions, abbreviated terms and symbols.....	17
3.1 General DLMS®/COSEM definitions	17
3.2 Definitions related to cryptographic security	22
3.3 Definitions and abbreviated terms related to the Galois/Counter Mode.....	32
3.4 General abbreviated terms.....	34
3.5 Symbols related to the Galois/Counter Mode	38
3.6 Symbols related the ECDSA algorithm	38
3.7 Symbols related to the key agreement algorithms	39
4 Overview of DLMS®/COSEM	39
4.1 Information exchange in DLMS®/COSEM	39
4.1.1 General	39
4.1.2 Communication model	40
4.1.3 Naming and addressing	41
4.1.4 Connection oriented operation.....	44
4.1.5 Application associations	45
4.1.6 Messaging patterns	46
4.1.7 Data exchange between third parties and DLMS®/COSEM servers	47
4.1.8 Communication profiles	48
4.1.9 Model of a DLMS®/COSEM metering system.....	50
4.1.10 Model of DLMS®/COSEM servers.....	50
4.1.11 Model of a DLMS®/COSEM client.....	52
4.1.12 Interoperability and interconnectivity in DLMS®/COSEM	53
4.1.13 Ensuring interconnectivity: the protocol identification service.....	53
4.1.14 System integration and meter installation	53
4.2 DLMS®/COSEM application layer main features	54
4.2.1 General	54
4.2.2 DLMS®/COSEM application layer structure	54
4.2.3 The Association Control Service Element, ACSE	55
4.2.4 The xDLMS application service element	56
4.2.5 Layer management services	64
4.2.6 Summary of DLMS®/COSEM application layer services.....	64
4.2.7 DLMS®/COSEM application layer protocols.....	65
5 Information security in DLMS®/COSEM.....	65
5.1 Overview.....	65
5.2 The DLMS®/COSEM security concept	65
5.2.1 Overview	65
5.2.2 Identification and authentication	66
5.2.3 Security context.....	69
5.2.4 Access rights.....	69
5.2.5 Application layer message security	69
5.2.6 COSEM data security	72
5.3 Cryptographic algorithms	72

5.3.1	Overview	72
5.3.2	Hash function	72
5.3.3	Symmetric key algorithms.....	73
5.3.4	Public key algorithms.....	80
5.3.5	Random number generation.....	90
5.3.6	Compression	91
5.3.7	Security suite.....	91
5.4	Cryptographic keys – overview.....	92
5.5	Key used with symmetric key algorithms	92
5.5.1	Symmetric keys types	92
5.5.2	Key information with general-ciphering APDU and data protection	94
5.5.3	Key identification	94
5.5.4	Key wrapping.....	95
5.5.5	Key agreement	95
5.5.6	Symmetric key cryptoperiods	96
5.6	Keys used with public key algorithms	96
5.6.1	Overview	96
5.6.2	Key pair generation	96
5.6.3	Public key certificates and infrastructure.....	97
5.6.4	Certificate and certificate extension profile	100
5.6.5	Suite B end entity certificate types to be supported by DLMS®/COSEM servers	108
5.6.6	Management of certificates.....	108
5.7	Applying cryptographic protection	113
5.7.1	Overview	113
5.7.2	Protecting xDLMS APDUs.....	113
5.7.3	Multi-layer protection by multiple parties.....	126
5.7.4	HLS authentication mechanisms	127
5.7.5	Protecting COSEM data.....	130
6	DLMS®/COSEM application layer service specification	131
6.1	Service primitives and parameters	131
6.2	The COSEM-OPEN service.....	133
6.3	The COSEM-RELEASE service.....	138
6.4	COSEM-ABORT service.....	141
6.5	Protection and general block transfer parameters	141
6.6	The GET service	146
6.7	The SET service	149
6.8	The ACTION service	153
6.9	The ACCESS service	156
6.9.1	Overview – Main features	156
6.9.2	Service specification.....	158
6.10	The DataNotification service	162
6.11	The EventNotification service.....	164
6.12	The TriggerEventNotificationSending service	165
6.13	Variable access specification	166
6.14	The Read service.....	166
6.15	The Write service.....	170
6.16	The UnconfirmedWrite service	173
6.17	The InformationReport service	175

6.18	Client side layer management services: the SetMapperTable.request	176
6.19	Summary of services and LN/SN data transfer service mapping	176
7	DLMS®/COSEM application layer protocol specification	177
7.1	The control function	177
7.1.1	State definitions of the client side control function	177
7.1.2	State definitions of the server side control function	179
7.2	The ACSE services and APDUs	181
7.2.1	ACSE functional units, services and service parameters	181
7.2.2	Registered COSEM names	184
7.2.3	APDU encoding rules	187
7.2.4	Protocol for application association establishment	187
7.2.5	Protocol for application association release	193
7.3	Protocol for the data transfer services	196
7.3.1	Negotiation of services and options – the conformance block	196
7.3.2	Confirmed and unconfirmed service invocations	197
7.3.3	Protocol for the GET service	199
7.3.4	Protocol for the SET service	202
7.3.5	Protocol for the ACTION service	205
7.3.6	Protocol for the ACCESS service	207
7.3.7	Protocol of the DataNotification service	208
7.3.8	Protocol for the EventNotification service	211
7.3.9	Protocol for the Read service	212
7.3.10	Protocol for the Write service	215
7.3.11	Protocol for the UnconfirmedWrite service	219
7.3.12	Protocol for the InformationReport service	220
7.3.13	Protocol of general block transfer mechanism	221
7.3.14	Protocol of exception mechanism	243
8	Abstract syntax of ACSE and COSEM APDUs	244
9	COSEM APDU XML schema	263
9.1	General	263
9.2	XML Schema	263
Annex A (normative) Using the DLMS®/COSEM application layer in various communications profiles		285
A.1	General	285
A.2	Targeted communication environments	285
A.3	The structure of the profile	285
A.4	Identification and addressing schemes	285
A.5	Supporting layer services and service mapping	286
A.6	Communication profile specific parameters of the COSEM AL services	286
A.7	Specific considerations / constraints using certain services within a given profile	286
A.8	The 3-layer, connection-oriented, HDLC based communication profile	286
A.9	The TCP-UDP/IP based communication profiles (COSEM_on_IP)	286
A.10	The wired and wireless M-Bus communication profiles	286
A.11	The S-FSK PLC profile	286
Annex B (normative) SMS short wrapper		287
Annex C (normative) Gateway protocol		288
C.1	General	288
C.2	The gateway protocol	289

C.3	HES in the WAN/NN acting as Initiator (Pull operation)	290
C.4	End devices in the LAN acting as Initiators (Push operation).....	291
C.4.1	General	291
C.4.2	End device with WAN/NN knowledge	291
C.4.3	End devices without WAN/NN knowledge	291
C.5	Security	291
Annex D	(informative) AARQ and AARE encoding examples	292
D.1	General.....	292
D.2	Encoding of the xDLMS InitiateRequest / InitiateResponse APDU	292
D.3	Specification of the AARQ and AARE APDUs	295
D.4	Data for the examples	296
D.5	Encoding of the AARQ APDU.....	297
D.6	Encoding of the AARE APDU	300
Annex E	(informative) Encoding examples: AARQ and AARE APDUs using a ciphered application context.....	306
E.1	A-XDR encoding of the xDLMS InitiateRequest APDU, carrying a dedicated key.....	306
E.2	Authenticated encryption of the xDLMS InitiateRequest APDU	307
E.3	The AARQ APDU	308
E.4	A-XDR encoding of the xDLMS InitiateResponse APDU	310
E.5	Authenticated encryption of the xDLMS InitiateResponse APDU	311
E.6	The AARE APDU	312
E.7	The RLRQ APDU (carrying a ciphered xDLMS InitiateRequest APDU)	314
E.8	The RLRE APDU (carrying a ciphered xDLMS InitiateResponse APDU).....	315
Annex F	(informative) Data transfer service examples	316
F.1	GET / Read, SET / Write examples	316
F.2	ACCESS service example	333
F.3	Compact array encoding example	334
F.3.1	General	334
F.3.2	The specification of compact-array	335
F.3.3	Example 1: Compact array encoding an array of five long-unsigned values.....	336
F.3.4	Example 2: Compact-array encoding of five octet-string values	337
F.3.5	Example 3: Encoding of the buffer of a Profile generic object	338
F.4	Profile generic IC buffer attribute encoding examples	339
F.4.1	General	339
F.4.2	Get-response with Profile generic normal encoding example	340
F.4.3	Get-response with Profile generic null-data compressed encoding example.....	342
F.4.4	Get-response with Profile generic compact-array encoding example.....	345
F.4.5	Get-response with Profile generic null-data and delta-value encoding example.....	347
F.4.6	Comparison of various encoding methods for Get-response APDU	350
F.4.7	Combination of the various encoding methods and V.44 compression	350
Annex G	(normative) NSA Suite B elliptic curves and domain parameters	352
Annex H	(informative) Example of an End entity signature certificate using P-256 signed with P-256	354
H.1	Fields of public key certificates	354
H.2	Example of a Root-CA Certificate using P-256 signed with P-256	355

H.3	Example of an end entity digital signature Certificate using P-256 signed with P-256	356
Annex I (normative)	Use of key agreement schemes in DLMS®/COSEM.....	357
I.1	Ephemeral Unified Model C(2e, 0s, ECC CDH) scheme	357
I.2	One-Pass Diffie-Hellman C(1e, 1s, ECC CDH) scheme	360
I.3	Static Unified Model C(0e, 2s, ECC CDH) scheme	363
Annex J (informative)	Exchanging protected xDLMS APDUs between TP and server	367
J.1	General.....	367
J.2	Example 1: Protection is the same in the two directions	367
J.3	Example 2: Protection is different in the two directions	368
Annex K (informative)	Significant technical changes with respect to IEC 62056-5-3:2017.....	370
Bibliography.....		373
Figure 1	– Client–server model and communication protocols	41
Figure 2	– Naming and addressing in DLMS®/COSEM	42
Figure 3	– A complete communication session in the CO environment.....	44

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ELECTRICITY METERING DATA EXCHANGE –
THE DLMS®/COSEM SUITE –****Part 5-3: DLMS®/COSEM application layer**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62056-5-3 has been prepared by IEC technical committee 13: Electrical energy measurement and control. It is an International Standard.

This fourth edition cancels and replaces the third edition published in 2017. This edition constitutes a technical revision.

The significant technical changes with respect to the previous edition are listed in Annex K (Informative).

The text of this International Standard is based on the following documents:

Draft	Report on voting
13/1890/FDIS	13/1904/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all the parts in the IEC 62056 series, published under the general title *Electricity metering data exchange – The DLMS®/COSEM suite*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

This fourth edition of IEC 62056-5-3 has been prepared by IEC TC13 WG14 with a significant contribution of the DLMS® User Association, its A-type liaison partner.

This edition is in line with DLMS® UA 1000-2, the "Green Book" Ed. 10:2020 and DLMS® UA 1000-2, the "Green Book" Ed. 10 Amendment 1 2021.

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this International Standard may involve the use of a maintenance service concerning the stack of protocols on which the present standard IEC 62056-5-3 is based.

The IEC takes no position concerning the evidence, validity and scope of this maintenance service.

The provider of the maintenance service has assured the IEC that he is willing to provide services under reasonable and non-discriminatory terms and conditions for applicants throughout the world. In this respect, the statement of the provider of the maintenance service is registered with the IEC. Information may be obtained from:

DLMS¹ User Association

ELECTRICITY METERING DATA EXCHANGE – THE DLMS®/COSEM SUITE –

Part 5-3: DLMS®/COSEM application layer

1 Scope

This part of IEC 62056 specifies the DLMS®/COSEM application layer in terms of structure, services and protocols for DLMS®/COSEM clients and servers, and defines rules to specify the DLMS®/COSEM communication profiles.

It defines services for establishing and releasing application associations, and data communication services for accessing the methods and attributes of COSEM interface objects, defined in IEC 62056-6-2:2021 using either logical name (LN) or short name (SN) referencing.

Annex A (normative) defines how to use the COSEM application layer in various communication profiles. It specifies how various communication profiles can be constructed for exchanging data with metering equipment using the COSEM interface model, and what are the necessary elements to specify in each communication profile. The actual, media-specific communication profiles are specified in separate parts of the IEC 62056 series.

Annex B (normative) specifies the SMS short wrapper.

Annex C (normative) specifies the gateway protocol.

Annex D, Annex E and Annex F (informative) include encoding examples for APDUs.

Annex G (normative) provides NSA Suite B elliptic curves and domain parameters.

Annex H (informative) provides an example of an End entity signature certificate using P-256 signed with P-256.

Annex I (normative) specifies the use of key agreement schemes in DLMS®/COSEM.

Annex J (informative) provides examples of exchanging protected xDLMS APDUs between a third party and a server.

Annex K (informative) lists the main technical changes in this fourth edition.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
